Discharge Summary by Ahmad Malik at 06/23/26 1515

Deaconess Care Group Discharge Summary
Deaconess Hospital
6/23/2026 3:15 PM

Patient Name: Lisa A English **Date of Birth:** 7/25/1964 **MRN:** 055656

CODE STATUS: Full Code

Admit Date: 6/19/2026

Discharge Date: 6/23/2026

Date of Service: 6/23/2026

Admitting Physician: Joseph A Mansour, MD

Attending Physician: Ahmad T Malik, MD

Primary Care Physician: Kang Smith, Jung Wook

Admitting Diagnosis:

Morbid obesity due to excess calories (HCC)

Physical debility

DM hyperosmolality type II, uncontrolled (HCC)

Chronic respiratory failure with hypoxia and hypercapnia

Generalized anxiety disorder

Dependence on non-invasive ventilation

COPD, end-stage

Discharge Diagnoses:

Morbid obesity due to excess calories (HCC)

Physical debility

DM hyperosmolality type II, uncontrolled (HCC)

Chronic respiratory failure with hypoxia and hypercapnia

Generalized anxiety disorder

Dependence on non-invasive ventilation

COPD, end-stage

B/L Subconjunctival hemorrhage

Chief complaint: Debility

History

The patient is a 61 y.o. female with a past medical history notable for chronic debility/wheelchair-bound, former smoker/severe COPD oxygen dependent on chronic steroids and dupixent, chronic respiratory failure with hypoxia and hypercapnia, hypertension, hyperlipidemia, type 2 diabetes mellitus, CAD, depression/anxiety/PTSD, chronic anemia, kidney stones, GERD.

She was discharged home yesterday from hospital due to severe COPD exacerbation, short words Augmentin for possible right upper extremity cellulitis.

She presented back from home via EMS due to an inability to care for herself, she requires help at home in transition between recliner to the scooter, her son is not able to help her, she has been sitting in the recliner since discharge yesterday from hospital.

Afebrile, heart rate 180, respiratory 20, BP 152/69, 97% on 2 L
Lab significant for WBC 11.5, hemoglobin 9.3, glucose 109, CPK 22, ABG pH 7.4/62.8

She received DuoNeb, admission requested for potential placement.

Incidentally patient found to have bilateral subconjunctival hemorrhages. She denied ocular pain and visual changes. Recommended holding aspirin for few days. Patient should take medications for intractable nausea and cough to prevent extreme Valsalva.
